Stock Route Management Plan

Maranoa Regional Council invites users of the stock routes, land managers and our communities to participate in consultation workshops for the preparation of its Stock Route Management Plan 2024-29.

The Plan will address use and management of the stock route and facilities. It sets Council's objectives and management strategies for the next five years and outlines Council, user and land manager responsibilities.

Workshops

Workshops will provide information about management of the stock routes, and seek stakeholder feedback on issues, proposed objectives and management strategies.

- Values and uses
- Permits and compliance
- Asset and pasture management
- Other impact management
