

## Maranoa Watering Schedule (ex. Surat)

At its meeting on 25 January 2022 Council adopted the *Watering Schedule Policy 2021* for the Maranoa excluding Surat.

This following water schedule applies to all potable (drinking) water users in towns across the Maranoa region, with the exception of Surat.

### Summer Watering Schedule

**1 September – 31 March** (Effective 25 January 2022)

Odd numbered properties may water before 9am and after 4pm on Tuesdays, Thursdays and Saturdays.

Even numbered properties may water before 9am and after 4pm on Wednesdays, Fridays and Sundays.

On Mondays, hand-held hoses are permitted but no unattended hoses or sprinklers may be used by any domestic households or businesses unless prior written approval has been granted.

### Wintering Watering Schedule

**1 April – 31 August**

Odd numbered properties may water at any time of the day on Tuesdays, Thursdays and Saturdays.

Even numbered properties may water at any time of the day on Wednesdays, Fridays and Sundays.

On Mondays, hand-held hoses are permitted but no unattended hoses or sprinklers may be used by any domestic households or businesses unless prior written approval has been granted.

### Alternative Water Supplies

Residents with alternative water supplies are allowed to use them at any time. Council recommends displaying a sign that indicates a private water source is being used on the property to avoid confusion regarding compliance with water restrictions.

## Exemptions

To request an exemption from water restrictions, contact Council using one of the methods below:

- Phone: 1300 007 662
- Post: PO Box 620, Roma QLD 4455
- Email: [council@maranoa.qld.gov.au](mailto:council@maranoa.qld.gov.au)
- Fax: 07 4624 6990
- In person at a customer service centre – visit [www.maranoa.qld.gov.au/contact-us](http://www.maranoa.qld.gov.au/contact-us) to find your nearest location.

A circumstance which may be granted an exemption is watering new turf.

## Why are we doing this?

To regulate water usage across the Maranoa to ensure the peak usage is reduced. This decreases the need for additional costly capital upgrades while supplying adequate flow and pressure to all consumers.

Resolution Number: OM/01.2022/16
