

Gas Suppliers

Maranoa Regional Council is able to supply natural gas to residents and businesses in Roma, if located near the current gas network.

For large LPG cylinders, consult the [Telstra Yellow Pages](#) for gas suppliers. Retailers of gas appliances can also be found this way.

LPG cylinders used for recreational purposes (barbeque, camping) require particular care. These cylinders usually contain nine (9) kilograms of LPG and can be refilled or exchanged at most service stations.

All cylinders must have a valid 10 year stamp to be refilled. Gas refilling stations are obliged to check the date of every cylinder to be refilled. If the cylinder is not “in test” then it should not be filled.

Keep cylinders secure during transport, and don't carry them in the passenger compartment. Use and store your cylinder in a well ventilated area, and store away from excess heat and possible sources of ignition.
